Call for proposals 2021
Advancing inclusive health and care solutions for ageing well in
the new decade
Info Days to take place from 27-28 January (online)

ID: 18390

Scadenza: 00-00-0000

Ente finanziatore: Active and Assisted Living Program (AAL)

Soggetti ammissibili >> non-profit profit

Consortium composition of at least 3 independent eligible organisations (legal entities), from at least 3 different AAL Partner States participating in the Call for Proposals.

N.B. Applicants for Small Collaborative Projects should check in the list of countries reported below whether their respective funding agency will fund this type of project.

Consortia must include:

at least one business partner at least one eligible SME partner which can be the business partner at least one eligible end-user organisation

Consortia

The number of partners should be from 3 to 10, from at least 3 different participating countries Partner should be from at least 3 different participating countries; the number of partners should be proportionate to the scope of the project

Only organisations that are explicitly described in the national eligibility criteria are eligible for funding.

Obiettivi >>

The scope of the call is built along the following objectives:

A) Collaborative projects

- Developing, testing, validating, scaling -up and integrating innovative ICT solutions for ageing well into re-designed service delivery models aimed at guaranteeing a positive "health" (See Call rationale)
- Supporting the public health and care systems, contributing to the creation/strengthening/connection of healthy ageing ecosystems and promoting the development of digital literacy among the end users

Collaborative Project proposals in AAL Call 2021 are expected to be user-driven through co-creation and address a specified challenge. The Call emphasises a strong involvement of end-users — especially secondary and tertiary — and other relevant stakeholders in the shaping of solutions and in creating respective markets and ecosystems.

Proposals should aim to develop ICT-based solutions to support older adults by addressing issues such as well-being, lifestyle, comfort, digital and health literacy aspects. These projects have a short time-to-market (maximum 2 years after project end), and should have a clearly described route to market and an identified leader for commercialisation. This could be an SMEs, large industry, or an end-user organisation, acting as business partner. Pilots and related testing and evaluation shall be carried out in at least 2 countries.

B) SMALL collaborative projects

- Exploring new ideas, new collaborations as well as new user approaches for ICT-based solutions designed to support older adults
- Proposing proofs of concept for further development of innovative ICT solutions
- Rapid evaluation of the business potential of available/ new AAL products and services

Proposals should reach out to new stakeholders for inclusion in (future) development of AAL solutions, build strong collaborations with end-user organisations and other stakeholders and support community building with new customers. They can result in well-substantiated ideas or proposals for AAL solutions to be submitted in a later AAL call (or elsewhere). Moreover, in Small Collaborative Projects, partners in submitted proposals are expected to collaborate intensively with end-users at an early stage in order to achieve one or more of the following objectives:

- Thoroughly investigate the wishes and needs of end-users for appealing solutions
- Explore novel and improved approaches for involving all types of end-users and stakeholders in the development of AAL solutions
- Provide evidence in relation to expected benefits for end-users and for end-user organisations, enhancing the latter's own processes (including for the improvement of service delivery)
- Explore ways for opening up the market for ICT-based solutions for older adults; and
- Assess the market potential of a proposed AAL concept

N.B. Call 2021 Info Days to take place from 27-28 January, 2021 in an online format

Contributo >>

Grant size:

max 2.500.000 euro (indicative 2 projects will be funded)
max 300.000 euro

Budget complessivo >> EUR 21.019.900,00

Territori: Italia - Unione Europea -

Area Tematica: Anziani - Innovazione tecnologica - Internazionalizzazione - Ricerca e sviluppo - Salute -
